

Azuma Summer Fellowship

Dr. Richard E. Azuma
University of Toronto

The **Richard E. Azuma Summer Fellowship** hires outstanding undergraduate students, from one of TRIUMF's member universities in Canada, who are considering a career in research fields associated with TRIUMF's science program. Fellows in the summer before their graduating year will be challenged by a unique summer work-integrated learning experience at a world-class subatomic physics laboratory. Fellows going on to a graduate program at one of TRIUMF's member universities will be eligible for a \$5000 entrance scholarship.

To fulfill TRIUMF's values of Equity, Diversity, and Inclusion (EDI) and commitment to our Strategic Plan, the Azuma Fellowship seeks to actively recruit members of underrepresented groups who have experienced historic and/or current barriers to equity. We encourage applications from members of the following groups: Indigenous peoples, women, racialized persons, persons with a disability and persons of marginalized sexual orientation, gender identities and gender expressions.

For details and eligibility, please visit www.triumf.ca/azuma-fellowship

Application deadline: January 7, 2022
